

Metal Fabrication: “Fab Straps”

Crossroads C&I is your go-to fabricator for any metal products

We are excited to offer precut and assembled banding. Commonly referred to as “Fab Straps,” these bands will help save you time in the field securing insulation and cladding. This inexpensive option over traditional banding and seals are compact and lightweight for ease of shipping and can be made in any length you require. We stock an extensive range of sizes making ordering quick and easy.

Our standard product offering is T304 stainless steel in ½” and ¾” widths and .020” and .015” thickness. Custom applications, such as colored banding, expansion springs, and custom lengths and readily available upon request. Our fab straps are perfect for all your application needs, from pipes, to tanks and cokers. We can provide any design or length required along with installation tools for your convenience.

Fab straps come conveniently packaged in bundles of 10 or 20 pieces and in small boxes to minimize freight expense and reduce space required to store on site. All banding is also deburred and polished to minimize the risk of cuts and provide a high-quality finish for your applications.

Talk to your local branch or sales representative today about this innovative and time saving product!
